

## '88 944 - Engine Builder Special

Posted by carsandcapp - 01 Dec 2013 12:50

---

OK, I bought this car out of the Rocky Mountain region 18 months ago. Things have changed for me so it is up for sale. I bought the car in non-running condition with the intent of rebuilding the motor and racing it in the SouthEast Region. The car is now sitting in Charlotte near I-77 and Tyvola. I got the motor removed (in plastic bins) and had the valve covers powder-coated and purchased some other new parts. The windshield was damaged in transit so I have a new plexi-glass windshield sitting in a box.

The car has all the "right" parts with respect to the suspension and exhaust and cage (Hanksville). The car has some other extra parts including a 2nd set of phone dials and front valence. I have a link to the original pictures and the car pretty much looks the same except with the engine out.

I am asking \$3200. Pretty sure that is fair and I have been told that it would part out for more, but no time for that. I honestly rarely visit this forum much anymore, so hit me up via text (704.305.7000) or email:
