

Quick Release Hub, Steering Wheel, Steering Shaft

Posted by dpRacing Dan - 07 May 2012 07:53

I removed the steering shaft with the welded on hub, and pin-style quick release with steering wheel from my 944 because I needed to do something different to get the wheel closer to me (I sit with it damn-near in my lap). Was easier to just replace the entire assembly.

Want to pass it on to another racer. \$75 will include everything!

Located in IL- can ship.

Pics coming soon.

Hey Dan-

I'll take it- can you give me your email?

Brian
