

Ground Control Coilover Kit

Posted by spec944#74 - 08 Jul 2012 16:15

Ground Control's top of the line coilover conversion kit, installed but never run. Set up to run with torsion bars deleted. 440 lb/in front springs and 700 lb/in rear springs, assembled with bump stops. \$1460 if purchased from GC, will sell for \$1100 plus shipping, which is 25% off. Legal for POC, PCA and 944 Cup, NOT legal for NASA 944 Spec but legal for all NASA GTS. PT and ST classes. These were on a car I bought to build a new 944 Spec car and they have never been on the road. Car blew the motor before previous owner even got to drive it with the new suspension. These are just like they came out of the box.
