Re: Promotion on Hawk Brake Pads Posted by JerryW - 13 Dec 2011 20:59 Awesome - Thanks Eric and Jay Re: Promotion on Hawk Brake Pads Posted by cgktexas - 14 Dec 2011 07:01 Thanks. This seems pretty much inline with Porterfield (20% off for NASA members) Do the DT-60 rears work better with the Blue front. I know I have seen some run blue front and rear, but have also heard of other using a different compound in the rear (to reduce rear lock up?) Getting ready to purchase, so just looking for some input here. Thanks again -Curt ______ Re: Promotion on Hawk Brake Pads Posted by Sterling Doc - 14 Dec 2011 15:46 I would **not** expect DTC-60's to improve rear lockup versus Hawk Blues, as they are at least as aggressive. Many local guys have had luck with the HP+ compound in the rear to reduce rear lockup. DTC-60s may work in the rear, with DTC-70s in the front, but not in combination with the Blues.

Re: Promotion on Hawk Brake Pads Posted by B1BFlyer - 15 Dec 2011 08:30
From my recent experience, after switching from Hawk Blues in the front to DTC-70s front and 60s real stopped flatspotting front tires from the blues locking up and noticed a remarkable difference in my braking application feel.

Thanks! I may end up going that route. How are they on rotors?
