

What size is the steering wheel shaft?

Posted by lonestarrpm - 13 Jun 2015 13:32

3/4" or 5/8"?

Looking to find a quick release for a sparco wheel.

Mike

Just buy a Momo hub adapter and then use a NRG bolt on quick release. Great QR that can only go on one way and locks securely. That way everything is easily removable.

The threads are 5/8, the splines 3/4. We did the same thing, but went with the Rogue Engineering QR.
