## 944-SPEC - 944SPEC - low cost wheel to wheel racing

Generated: 8 September, 2025, 20:07

I think I have a bad alternator, but I'm troubleshooting it.

Does anyone know if the alternator is internally or externally regulated? If I find the alternator isn't working right (which seems to be the case), I'm wondering if I can just bring in the alternator itself, or if I need to bring the whole car to my electrically knowledgeable dad.
