944 spec drift passing
Posted by SvoChuck - 15 Feb 2008 09:32

In the first one I am passing Chris at MPH (motorsport park Hastings) it's a race for second place behind "Der Kommissar" . Chris enters the turn wide and leaves the door open!

Second one is Woody "Drift King" driving my old car a 944 Turbo has over twice the power as a 944-spec car but won't quite turn as well as one. Chris (white car to the left) and I are in a tight battle for season points . I see Woody coming so I move to the inside to force him around the outside. Chris stays left so Woody drives it in HOT then goes for a ride.
