

Nationals Laguna Seca count down

Posted by jivenjim - 27 Jun 2015 21:47

Hey All

Only 5 weeks.

Do we have a role call?

Laguna Seca is such a fun track.

Looking forward to see everyone.

Revised schedule out and we are in same race group as E30. They have opened up a supersize option for GTS1. The schedule will work to run both. The cost is \$399. GTS1 class is us and E30 so we could create a great competition between ourselves and E30 I have signed up for GTS1 supersize. I think Charlie will do the same. I have made a posting on NASA forum to ask for E30's to sign up.

Well I was hoping to race in E30 and 944 but if you are correct on the schedule change then I will be in Gts1 and E30.

Charlie I emailed you the revised schedule. Supersize is open on NASA sight.

One last reason to supersize. At \$399 that amount is very similar to a normal race weekend plus testing at Buttonwillow. So if not happy about only 5 events this year for that price you get a full three day weekend making it 6 events for the year.
