

944 Spec compound

Posted by cbuzzetti - 16 Aug 2013 22:24

Is there any plan as far as a 944 Spec compound for the RVs like in 09 and 10?

It worked out great and it was a good meeting and gathering place.

Did we get a community garage?

Any one have a count on the number of RVs?

OK thanks for the answer. I could not remember how the garages were configured last time and the sign up was not clear on that.

The ultra late dyno sign up is a pain. I sure hope we can get some time reserved so we can at least get a baseline to know where we are.

Just saw the following on the NASA forums

Dyno Info

The official dyno for the event will be operated by MCE Racing. Please contact Kevin Murray for scheduling dyno time on Tuesday or Wednesday. Contact info [HERE](#):

Unfortunately they are telling me they are already booked solid as of noon today unless they are allowed to run the dyno until 7 pm.

Nasa has the dyno booked for all of Thurs-Sun.

Yeah, we all got an email, and then it was almost instantly booked out. I have an email into Will asking to let them run later - they did at Mid-O.

I think there will be another dyno there. The race shop I take my car to has a Mustang dyno and last I talked to them they were planning on bringing it. I don't know if things have changed for them or not, I'll send them an email and check.
