Looks like mine is toast. Anyone have a good one out there?

I usually see them on eBay, but not now of course. Dart doesn't have any either.

\$180 for a NEW radiator? That sounds like a good price. Do you have a Silla, Cullen (or does anyone else?)

Not yet, but probably will get one of those when I get the car back from VFC. Our (only) local radiator guy with the tank and the fin combs retired (I think he sold his HEMI Roadrunner.... there's a retirement plan !), so new is probably my best bet for a reliable cooling system.....
