

Decal Time !!

Posted by cullenwinter - 10 Feb 2008 12:28

Hi Chuck, we're supposed to be in the mid 40's tomorrow.....time to get all my vacuum and cables in place and fire that bad boy up !! Yep, you guessed it, time for those number panels and assorted DART, Toyo, and NASA stickers (did I miss some ?). If you can, please get them mailed out to me, I don't want to do a rushed shlocky job of stickering at Pueblo. Thanks for everything

Yeah, the track is the worst place to put decals on, especially at a colder event (ie March). Definitely do it ahead of time if you can.

Speaking of which... Chuck, any ETA on when we'll be able to get some big NASA decals that'll fit the 944's?

Re:Decal Time !!

Big that fit ...? good question . did you want to try and cut the current one ? If the 944 use a different decal then we have a few extra of the other ones...

Re:Decal Time !!

I think the easiest way would be to just cut the 944spec part off for the 944's and center the NASA RM part over the rear wheels. I suppose we could put the 944spec part somewhere else, but at that point, I'd be willing to pay for a 944spec sticker that would blend in better than another white rectangle on a red

car.
