

Race for the Pi 2016 - Road Atlanta - March 12-13

Posted by AgRacer - 15 Feb 2016 20:02

We're two events into the 2016 season and are now entering the schedule that should have nicer weather. The March event is at Road Atlanta, a track that usually has higher car counts.

10 CARS REGISTERED WITH 1.5 WEEKS TO GO!!!

3-5 cars will be put on the dyno over the course of the week end for compliance dynos. Be prepared to head to the dyno after a session. As a reminder, if you get a dyno ticket, you are to head directly to the dyno from tech. Do not open your hood to add fluids. You will be allowed to top off your oil before the pulls but before you do, make sure a NASA official is around to watch before you open your hood.
