

Hallett Summer Shootout '12

Posted by AgRacer - 14 Jun 2012 05:51

Had an awesome time at Hallett. The track lived up to expectations set by my dad and everyone else. I learned some valuable lessons all around in race craft and strategy over the course of the week end. It would have been a lot harder to compete were it not for the support I got from the other 944 guys between Phil #1 changing my master like a pro and Phil #2 installing my transponder and letting me mooch some of his A/C in his RV. Todd and I had quite a battle for most of the 40 min main event. I think if I hadnt of thrown it away in 3 we could of had a 3 way battle for the win in the last 4 laps or so with Al. My race 4 video is posted below.

<youtu.be/p8cg3YamEcM?hd=1>

Special thanks goes out to Chuck Taylor for providing me with the brake master that got me through the week end!
